PROFILE

I'm a driven and versatile tech enthusiast with hands-on experience across networking, programming, and web development! From mastering **Networking** with **Packet Tracer** to building foundations in **Java, C++, C#, SQL, HTML, and CSS.** My passion lies in understanding systems end-to-end from backend logic to front-end design and I thrive on turning complex problems into clean, working solutions. I'm motivated by growth, and every percentage point on my skill bar represents real dedication and hunger to become a well-rounded developer and network engineer.
